

## AV Breakout Room Operation

Press the **POWER** button to turn on the monitor. Select **PC** (if available), **VGA**, or **HDMI**.

Control the System Volume using the Volume adjustment and Mute buttons

Connect your device and necessary adapters to the **HDMI** *or* **VGA** cable. Power on your device.

If your source device is awake and connected but not displaying, unplug the adapter or cable from your device and then reconnect.

If necessary, change your device display resolution to **1920x1080** (1080p).

To adjust display resolution settings:

**Mac Laptops:** Open *System Preferences > Displays > Select Scaled*. Set screen resolution to 1920x1080 (or 1080p)

**Windows Laptops:** Right click on desktop and select *Screen Resolution*. Set screen resolution to 1920x1080 (or 1080p)

When finished, power off the system by pressing the **POWER** button.
